QUALITY POLICY

We will delight our partners by continuously producing to specifications as contained in the quality agreements and other related quality documents.

In order to achieve this, we will;

1. Adhere to GMP (Good manufacturing Practices) by always keeping our site at standard (processes, equipment, surroundings, offices and production floor).
2. Liaise with regulatory bodies, and ensure we meet all regulatory requirements as a means of continuous improvement.
3. Conduct a scheduled internal audit to check the health of our quality systems, and improve continuously on new learnings.
4. Continuously building the capability of our people through scheduled training programs
5. Reward exceptional quality behaviors and cultures
